

blocks were blocks and all fastened to our
gold plate - forming thus, a complete arch block
The 3 blocks were in the correct relation
block. They were covered with space saving
block.

These teeth were fastened with platinum
pins. —

An accident occurred in making one of the
teeth which compelled me to work nearly all
night - the night before the Medical College was
opened, it was so arranged that I had to make
one block new. —

We finished them 30 minutes before the
opening of the Medical College - my assistants
were Mr. Holbrook, I did not find that day were
entirely perfect & required the tongue soon in the
patient again. When I next saw him he said he
did not feel as if he had room enough for his tongue.
I ground the lower box in order to make more
room for the tongue, & it was used to do on
every small amount.

I saw Dr. P. occasionally I made much small
operations to be made. — The last time
I saw him to look at his teeth was two weeks
previous to his disappearance; he called later in
the evening having broken a spring
He called about 10 o'clock. I had gone to bed. But he
was asked in & I was told of it. I rose and
down. He told me his trouble. I took out
both sets of teeth examined them fully;
