

Then when they belong. They believe these
 teeth belong to the upper jaw. - This to the
 the life upper jaw. This is the remains of the
 front upper block, more visible than the
 others.

The life lower block is nearly entire. -
 I ~~Amos~~ believe in upper lower jaw, though
 I think it is an error it does belong to the

There is a pair of a tooth which may be
 may not be the front lower block

Platypus pair remain attached to the teeth in
 the blocks

I find embedded portions of gold with these
 mineral teeth & some minute portions of bone.
 These portions of bone is cancellated, being peculiar to the
 lower bone.

I did see the teeth in the Dr's mouth
 the last time I saw him, that is the day before he
 disappeared.

The pressure in the air is strong and they are
 in the head when they are then into the
 fire. They absorb minute particles of water -
 & would explode if suddenly heated

X Dr L bought the same all written.

The name of Dr Portman was spread
 upon the ground at the time it was made.
 The mould was put by the patient was
 mainly in case of accident

He had had portions of teeth formerly.
