

The box has been broken & the  
lower left joint. I made that for Lewis just  
before he went to Europe.

I had of Dr P's disaffection by  
the adv<sup>ce</sup> - which I saw in Dr. Woodward's store.  
by his in defense single tooth.

In ~~the~~ describes what material with  
twisted roots of teeth remained in Dr P's jaws.

In grand I saw soon a root of natural  
tooth was found adhering to mineral bed, which  
was then broken off. in the presence.

The tooth was adhering even of the lower  
jaw. - The upper & lower were firmly  
adhering.

Dr. Lee Noble. I was an apprentice of Dr. Ruf.  
I entered his office in 1846 early part of the  
autumn - 11 or 12<sup>th</sup> Sept. & remained till July 49  
I was working with Dr. Ruf. for teeth for  
Dr. P. in autumn of 1846.

The name of "Dr. Postman Oct 1846"  
is in my hand writing & it will show  
it at the time.

The mineral teeth were shown me  
by the City Marshal. These are those  
which were shown me

I recognize one of the teeth.  
I read it from by its general shape  
- configuration. or any other one
