

little piece
key to put
- worn -
in L's room

I had made a solution of Sulphate of
iron, for crystallizing - it has been thrown
away - Drainsworth saw it under the
laboratory.

They opened
- locked
- loose!

What day & hour did I tell L - d to go
out through the lecture room?

Dr Geo. Hayward can say something
about L - d's habits & appearance of
intemperance.

in at the
- water -

7 & saying
got the

There is an opening in the door leading
to the dissecting room entry - a wooden
panel was cut out & hung on hinges
to admit air to the furnace - a man
could get through it - or could reach
up & unlock the door if bolted inside -
L - also had key to this door.

ties of
Pune
- small
bottle
if wanted
