

Dear Sir
Got my note of yesterday & this of today to
miss W. by all means today (Wed 9) —

The girls can testify that
I received a great variety of samples, of oil,
soap, coffee, wines &c for examination
& afterwards the persons often sent me
quite a supply of them, as payment &c
Not long since I had samples of Sublimé
sent me to examine & had left so large
a quantity that I sprinkled it all over
my garden as an experiment.

That Mr Lewis employed me to examine
a variety of lumps, & then sent me an
elegant Coral lamp as a present.

Mr Davies Cambridgeport — Soap maker —
has sent me much soap —

The girls recollect that I spoke about
getting fish hooks Monday at breakfast —
& that I showed them Thursday day
in my study.

→ If I got the 2 large hooks Mond. or Tues. or
Edgerly says, I could not want others
on the 30th —

If Judge Fay is not here — I beg you to
ask Prof. Horsford to take my two notes —
they are most important — Get them out
as soon as possible — will not Edw. & I often
take them at once? & he can bring in
the Chemistry (3^d edit) — & the lectures
on Affinity & colors by Nitrate Copper &c —
The letters frighten me — I never write one
rely upon me — My hand is seldom twice alike
& I write in haste always — the girls can say this —
