

From Mr. Schen

Perhaps it will after all be best
to say I never used the bench
furnace - but always the small
stove - as L - will testify there
never was a fire in the other
then if there was a fire
who made it?

I was too busy as up stairs &
not there long enough -
L. will admit too he always made
my fires.

Will it not be well to ask if
L's premises were searched
& if not, why not?

L. went with the police & may
have prevented their noticing
the furnace each time.

About the supper party the Hornsblods
went to on Wed's night - also Prof.
Apthorp - Dr Coale - Payser & Co can be
181 Washg^h St -

Once examined stomach as of a
horse supposed poisoned.
