

Am I right in supposing that⁵
as yet, the evidence has been
to identification, ~~there~~
inspiration I gave from
my agitation as to my
guilt or innocence - If
it is intended to attempt
to prove I did any thing
to myself - I hope you
will inform me, as
Dr Lewis he will be
got to testify that all the
symptoms arose from
the peculiarities of my
position & mode of ascent -
You can prove that I
was devoted to my family
& gave all the time I
could command to reading
to them & so & that
I was doing it at the
time -
