

I never took that key
from L's room -

Mrs L - often put my
bundle of keys I kept with
her in her closet - not
in the case with the others

The skeleton keys could
not fit one lock in the
M.C. as all these are
different kinds of mortice
locks & have brass keys
compare the keys -

The skeleton are iron
not one lock in the building
could be opened by them
- one perhaps, the lock on the
wardrobe head of stairs

L - I found the wine in
the upper room in a drawer
where I kept many things
very much in the laboratory
