

Will it do to case J. W. W.?
I rec'd the 300 Wed 4 & gave
him a check for next Friday
ev'g 30th

I think the inner door
in the women room, on
the left of the doorway into
the coal place between
the lower lab & L's
back room could not
be locked having been
warped or broken.
The bolts were only upon
one door in each coal place
& that the outer one.
The inner door never locked.
The window on L's side in
one coal place, & the move-
able panel on the other
in dispectory room entry
