

Mrs L. used to work in
her back room directly
under the window in
the partition, in summer.
The window often open
opened from her side.
She kept things in the
back place in summer.
Last year 1848-9 at end of
the lecture she asked me
to let her do so.

A door also from that
room opening to the
water - any thing could
be passed in to that
room, not seen from
any other rooms.

The window not in model
L. once kept a boat in
the room & could put it
in & out the door over the
water.
