

Knowing that Dr W should have happily told L
on Friday evening that he wanted no fire there
but, & yet that next day he should have seen
a L say the first fire in the Small bedroom that he
knew the wall on the W side of the building
was a fire - Knowing that L should have by an
easier question upon this subject than heard from Dr W
that no fire was wanted

What does L mean by saying that Dr W went up to
his room by the back door Wednesday evening? I presume
he means of the L. entering to the front entry - knowing
Dr W. should have been going to them directly to L

Now L. says he saw & talked with Dr W in 15th
20th minutes after he got one of the willows on Wednesday.
But he says, nothing, he has no idea about the fire
or his beam - Why not

This can not be on Wednesday night;
because of fasting.

Why can not L within the same short
space when he was beating in the room
on Monday? He has not yet been employed on the
3rd of Nov
