

File No. 7264 Continued.

CORRESPONDENCE.

I also asked him to look over the specifications, which he did, and returned them to me with the accompanying letter.

I presume, under the circumstances, we can proceed with the specifications as approved by Mr. Bruce, as Mr. Preston seems agreeable to this.

Kindly let me hear from you promptly in this matter.

Yours truly,

(Signed) Calvin W. Hendrick,

Chief Engineer.

File No. 7264.

DEPARTMENT OF PUBLIC SAFETY-IMPROVEMENTS.
SUB-DEPARTMENT OFFICE INSPECTOR OF BUILDINGS.
CITY HALL.

Baltimore, November 29, 1907.

Mr. Calvin W. Hendrick,
Chief Engineer, Sewerage Commission.

Dear Sir:-

I herewith return the specifications for the substructure and the superstructure for the Sewage Pumping Plant.

The law places all work intended by these specifications under the Inspector of Buildings, but ~~the law~~ ^{the law} ~~is now prepared,~~ ^{is now prepared,} all powers are delegated to other persons.

Ordinance No. 18, approved October 18th 1907, having gone into effect prior to notifying me of this building, it is a question with me if said law will not have to be complied with, although I would rather proceed with the drawings you have, if, after I shall have gone over them, I shall find them correct.

Should the City Solicitor decide that I can use these drawings, please let me have a full set of your drawings and the copies of the specifications, and I will have them altered to comply with the usual form.

Very truly yours,
(Signed) Edward D. Preston,
Inspector of Buildings.
