Note

On Sunday December 24th 1848, while sitting in my Starboard boat, My thoughts on the *Buque San Maria* of Fall River, which vessel my oldest son was one of her crew when she foundered south of the River of Plate, I saw a bottle past the ship with a cork in it and a small string attached to the neck of the bottle, I have every reason to believe that there was a paper in the bottle but there by some distress mariner, ²²⁸⁷ blowing fresh at the time we ²²⁸⁷ part¹¹ and and drawing towards night, Before we could stop the ship and get a boat down, it being so small an object we lost sight of it, Lat^{26.45} Long^{68.15}
