

Friday December 28<sup>th</sup> 1849

138 Days Out From New Bedford

This day commences with strong winds from N.E. Ship heading N.W. and going along nicely. God grant she may keep going so till we get in. Weather quite cool to day. Took in the waist boat on deck, and lashed the rest, preparatory to going out the Coast of California. They seem to expect rather rough times on the coast, but I don't apprehend anything very alarming. Because San Francisco is in lower latitude, than it is round our way, on the other side of Land. One thing I know, the week that is coming will be the longest one, any of us ever knew. Since we expect to get in Port, some time in the course of it. As it is only 900 miles distant from us now. Nothing Remarkable happened this day. So Ends All well.

Saturday Dec. 29<sup>th</sup> 1849. Commences with

strong winds from E.N.E. & N.E. Ship heading N.W. & N.W. and going very slow. It is so rough the Capt. makes any great head way. Took in Mizzen Top Gallant sail. & furlled it. Some pretty sure signs of a change of wind soon. I don't care how soon. Towards night took in Fore & Main Top Gallant sails & fly jibs. Painted the waist Boat & lashed her on the stern. Crew employed humpbugging round the ship. Nothing Remarkable happened this day. So Ends all well.

Course N.W. Wind N.E.

Lat 23° 39"  
Long 125° 00"

Sunday Dec 30<sup>th</sup> 1849. Commences with

cool, fine weather, wind from N.W. Ship away N. & W. S.W. We shall never get to California at this rate. Pray God the wind may shift for soon. This day is another long one in the list of lengthy days. Crew employed keeping the Sabbath, by washing and mending things & another. The wind kept knocking us off & in the night tacked N.E. & stood off on the other tack. Squally weather with rain. Nothing Remarkable happened this day. So Ends All well.

Lat 25° 02" North  
Long 126.12" West

Sunday, Dec. 31. Last day of the Old Year

This day commences with (blue & fine weather. Hope the Wind will come out somewhere for soon. Stood on different Tacks throughout the day, not more than an hour on any one at a time. Ship heading to all points of the Compass. Crew employed on rigging and other jobs. Towards night had a light air from N.W. Ship heading N. So Ends this the old year 1849. Adieu. We over shall see the new. How now art among the things that are past. Old Time has laid his sickle at thy roots, and swept thee off like Chaff. Thou hast gone to make room for a younger & more vigorous Year. Farewell 1850!!

Tuesday January 1<sup>st</sup> 1850. This Day

commences with fine weather and fair wind, although not quite enough of it. This is a fine beginning for the new year, I hope it will continue so, at least till we get in Port. I wish all those whom I have left behind may have a happy New Year & a prosperous one too. Although I am not near enough to them to convey my wishes good & bad by words. Yet probably they will be as well off with their thought as expressed. God bless them. Nothing Remarkable happened This Day. That I saw so Ends The first day of 1850.

Wind N.W. Course North.

Lat 26° 29"  
Long None Taken.

Wednesday January 2<sup>nd</sup> 1850. This

Day commences with fine weather, wind aft is to Southward but going ahead slow but here towards her destined Port. Let Studding sails aloft & aloft on both sides. I hope the wind will stand so for a week, after that I don't care how it is. Crew employed painting Boats &c. Mr. Serry fitting down rope stanchions in the Rail. Pray God there may be use for them before long (say 4 days). Since the wind hauled to the Southward the weather is rather warmer. In fact in the day time the it is nearly as warm as in summer it is with. Towards night the wind hauled on our quarter, and hauled up stronger. So the ship goes faster. Nothing Remarkable happened. So Ends all well.
