

Ship Isaac Howland

Thursday Heavy gales from the E.
June 14th and flying clouds steering
South under double reefed
topsails and fore course at
9 AM brought her to the
wind under those reefed main
topsail and storm staysails
We took up the deck sheathing
at meridian heading up East

Lat by Cos 27° 55'

Long by Ch. 74° 16'

Thursday

Friday
June 15th
1838

Strong Southwesterly gales laying
to under storm sails heading
up East

Lat by Cos 27° 30'

Saturday
June 16th

Set double reefed fore &
main topsails wind at
N.E. heading up East

Lat 27° 07' S

Cruising on Ship

Monday The wind continues to the South
with clear weather standing in
June 16th shore days and off nights under
1838 short sail the air is
uncomfortably cool no whales
in sight I saw a sail standing
in shore a whaler by the
appearance of her

Lat by Cos 26° 53' S

Long by D. R. 72° 00' W

Monday

June 18th
1838

Wind and weather continues
the same as yesterday at
9 AM wore her off shore
heading up N.W. under the
main sail and middle stretched
it, the times are dull and the
air is cold all things combined
makes me quite home sick I feel
themselves to the giver of all things
that our voyage will soon terminate
and I hope advantageous to us all

Lat 26° 40' South

Tuesday

June 19th
1838

North winds and clear
heading up N.W. the sailors
doing various necessary jobs
the carpenter and cooper
planing the deck

Lat 26° 50' South

Long 74° 05' W
