

not still for excitement - some of the Chaps are in
a bettering, others doing nothing - a gunning
sailed at 10 o'clock Boat ashore to fetch of some
Wood the best that we use to get in this place
after pulling ashore and going through the sea
we landed on the beach took our staves in our
hands and made the best of our way up the Bog-
al, Chit, about equator of a mile back from the
beach then we climbed the trees and cut the Limbs
of them cut it in to short pieces perhaps
two or three feet according to the size of it then
some of them will back it down then it is
cut for the stove and stored in to the Bogato
by Boat carrying about one Cord put on
board with it there was four Ships waiting for
the Pilot to guide them in carried the Capt-
up to the point where he takes a horse and
goes to the town about five miles distant
Broke out for water washed of quite a well
the Reef takes high this day the Boats of
some of the ships tried to go on the beach
but it was useless nothing doing some reading
others playing some of them took it in
to their heads to get weighed for one weighing
148 lbs

not much doing now aboard the ship got
all our Wood on board and came to us
by one of the Capts that our Capt was sick
and wanted the boat to come after him with
the Boat started on Sunday early in the
morning pulled up to the Town just to
the point then inside of the Reef saw
a Green Turtle stuck in a hole - then
our Capt came down with several others, here
rather better sight of the Specimens having
stayed in Cars this morning got ready for getting
under way one of them stuck in for another one
Weighted it for another ship in company
without started for the Watering place being
about 10 miles from the Harbor of the
came at anchor about 10 miles sent one left ashore
we found it a fine place to water and good
water there is three ships in here the Capt
bought pig, but looks sent them on board us
for the kill and then he divided another ship
came in a little after dark some of the Boats
a gunning came aboard had to get them up stood
at anchor then this night all hands called it
an early hour to get a raft ready for shore
got our Breakfast then started with the
Capt finished our Water this day amounting
