Aug 9.th Moderate winds from N. at
6 A.M. saw a sperm whale
going quick to windward. Covered
and chaired without success
We had constant good weather
ever since all the season - have
seen over a great deal of good
ground or what has been called good
ground but to day is the first time
in 6 weeks and the second time
in three months that we have seen
whales Lat 31.55
Long 46.40
