

Sun. Aug 2nd 1874.
Lat. 40.18 N. Lon. 44.09 W.
Commences with very
light SW winds and
continued so through
the day at 4 p.m. we
sighted three sails which
were still in sight
at sunset steering about
the same as we are.
We had a tip top
hash for supper
so ends the day, It
is very warm and
I begin to feel as
though ice cream
would taste good
any way I'd like to try it

Mon. Aug 3rd 1874.
Lat. 40.47 N. Lon. 42.10 W.
Commences with a
light S. breeze.
At 12 o'clock, raised
whales but found
them to be finbacks
At 7 o'clock P.M.
we raised more but
they were jumpers.
there were two vessels
in sight a dark, I
am tired of raising
these kind of
whales that are
good for nothing
but hope our time
will come by & by.
