

1114 Tuesday January 1st 1856

The day has been remarkable for its light baffling winds with incessant rain till noon when the weather cleared a pleasant aspect and the watch were set to washing the ship and deck with water. The rain again did much needed not for vegetation as to pay the usual subscribers usually have many dirty clothes and we all commenced our selves in the pleasant operation of washing a few articles of ready made clothing in the rain and the clothes we had on bore a striking resemblance to those in the tub so far at least as the damp dampness was concerned but the weather is warm and we are bound to rise when we will do so without our labor. It held off till 11 o'clock.

1115 Wednesday January 2nd 1856
