

Ther.

FRI. MAY 26, 1893

Wea.

Clear weather steamed
to N.B. all forenoon at
11 A.M. Coming between
a large flo of ice and a
big cake of ice, a piece
of ice shot out from
under the big cake struck
the Propeller and broke off
one blade. The Engine was
stopped at the time.

Ther.

SAT. MAY 27, 1893

Wea.

Breeze from N.E. & N.
came about 4 miles
very large flo of ice
came in to hole
close to the Thraashen
and took on board
the Copper Dams
ready to use for putting
on a new blade for
my Propeller
