WED. SEPT. 13, 1893

Wea.

To day has been a breeze from N.E. thick and snow all day ship under all sail and steam steering to westward coming along in about 15 fathoms water at 4 P.M. luffed too head yards aback 13 fathoms think I am 30 miles W.N.W. of Return Reef.

Finished boiling this morning have put all the coal from between decks into the bunkers to day washed the Decks and have had a general stricking up of things,
