87. Bark Have Exploring

Monday April 4th 1853

Commences with strong breeze and
pleasant squally of rain. Middle
& part rainy. Latter part the same
21 m out 400 sp and no prospect
of getting any more this voyage
frigging and fretting all the
time & I hope that old Knave
will get another just such
and old growl in all his
ship and then he will make
money but a Devil a bit
the rest will make so go
the world and mankind in
general never satisfied
&c

Lat 11.25 South
