Bark Waver March 10th 1853

1 year ago to day I thought this day we should have been homeward bound to day but instead of getting 500 lbs as we expected we have not got but 100 - in one year they we can see how short sighted is man and how vain is all his Expectations Still if there was no one but myself to support off of this voyage I would not wait so much - Now I have got about 14 months more to stay before I can see my family but if they are blessed with health it is all I can ask and am willing to leave the rest to a just god that they may enjoy health is the sincere prayer of a husband & father
