mare of of good breeding qualities with foal by a Blood Horse or a mare of the above qualities & a young filly I would try breeding Blood Horses

My Crops the last season were good & good prices were obtained for them - I sold my Rye at 80 Cents Corn 78 Cents, Oats 44 Cents at my Barn I had 10 acres of Wheat the last season, that crop is unsold - I should be pleased to hear from you & your success in all your agricultural enterprises & particularly your success in your breeding Blood Horses for the Turf -

Have you Betsy Wilson & hear you now Caroline that you have offered me & what is my age would not Arabian Arabian be profitable & good Horse for somebody in Maryland

I think some of takeing a trip next season into Michigan, Illenois & Missouri & its possible if I should be hapefully suited with the Country that I may sell our Estate here & try Agriculture in the far West on a large scale - I have one Son now settled as a Lawyer in Alabama & Nine more now at home - The number of my sons is what induces me to think of the West If I don't go with them they will surely go as they are now of a prosperous age therefore I have thought it might be best for me to go with them -

I am Dear Sir with esteem your Friend

Henry Watson
