VUU hosts back-to-school dinner for Baltimore students

COMMERCIAL CREDIT GRANT recipients Bridgette Wills and Jaran Foster are shining examples of some of Baltimore's Best attending Virginia Union University. Jaran is a sophomore majoring in business administration. Bridgette is an honor student majoring in banking. She is also a senior.

The Miles W. Connor Chapter of Virginia Union University wished to send its Baltimore area students back to school in style and decided to treat them to an exclusive catered banquet at an inner city Baptist church.

Over 150 freshmen and students appearing on the Dean's list, along with their parents, were invited to share a Get Acquainted & Farewell Dinner recently, at the Fellowship Hall of Trinity Baptist Church, 1401 Druid Hill.

Barbecued and baked chicken, macaroni and cheese and other soul-inspired recipes were enjoyed by all who attended.

"The chapter wanted the new students to share in our belief that only through good students and supportive parents, can Virginia Union University survive and flourish as the bench-work for professional excellence, stable values, religious convictions, and commitment," chapter president Harlow Fullwood said.

Fullwood further stated that the banquet was sponsored to give the freshmen, the upper classman and local alumni, an opportunity to meet one another and to let their parents know that, "we are interested in supporting their child, to achieve academic excellence."

Virginia Union University, a predominately black Baptist university of about 1300 students, is located in Richmond. Currently, there are more students from Baltimore attending VUU than any one of the other United Negro College Fund institutions. Also, there are more students from Baltimore on VUU Dean's list than any other location in the nation, with the exception of Richmond. Students are expected to report to the campus August 24th.

Highlights of the program provided greetings from Rev. William C. Calhoun, Sr., pastor, Trinity Baptist Church; the Honorable William Donald Schaefer, mayor of Baltimore City; the Honorable Kurt L. Schmoke, state's attorney for Baltimore City, Osborne A. Payne, member of the VUU Board of Trustees, Mrs. Dorothy E. Brunson, president, WEBB Radio, Dr. Miles M. Fisher, IV, president, VUU international Alumni Association, The Honorable Robert M. Bell, judge, Circuit Court for Baltimore City, Lenny Moore, member, N.F.L. Hall of Fame, and Mrs. Theda Wilson, regional superintendent, Baltimore City Public School System. Each speaker was tremendous in motivating and encouraging the students to continue to strive for academic excellence.

Following the VUU's Oath to Freshmen Students as given by David L. Swift, director of VUU Office of Institutional Advancement, each student was presented with a colorful "VUU Pennant" by the Chapter.

Loud applauses were given to VUU students who gave reflections on the following topics. "The Importance of Taking God to College" by Rev. Ronnie Fleming '84; "The Difference Between High School & College" by Paquita T. Fullwood '86; "What VUU Means To Me" by Valerie A. Jenkins '83; and "The Challenge of Tomorrow Begins Today" by Norman S. Phillips '83.

Each freshman student had a chance to win special door prizes as provided by the Miles W. Connor Chapter; Cash prizes of $25; clock radios; alarm clocks, luggage; dictionaries; tape recorders; irons and ironing boards.

Dean's list student attendees at the affair included Andre' C. Baldwin, Cheryl A. Eversley, Ronnie L. Fleming, Michele M. Hicks, Norman S. Phillips, Glenda P. Pierce, Barbara P. Session, Bridgette I. Willis, Audie M. Wilkins, Frank O. Wright and Pamela Harvey.

Freshman attendees included Michael A. Alston; Craig McCoy Parker, Nadine Walker and Nathelma Walker, Walbrook Senior High School; James G. Baylor, Reginald Jefferson, Milford Mill High School; Stephen L. Blackwell, Darrin O. Gordon, Tia Crawford, Forest Park Senior High School; Alicia N. Braxton, Woodlawn Senior High School; Karen L. Berkeley and Michelle Miles, Polytechnic Institute; Theresa F. Collins, Northwestern High School; Barry M. Fitzgerald, Northern High School; Rose E. Floyd, Paul Laurence High School; Keith M. Johnson, Cardinal Gibbons High School; Janice McLamb, Frederick Douglass High School; Leona S. White and Michael T. Wells, New City College; Vondales Spinney, Park Heights Street Academy; and Kelly-Marie Smith, Howard High School, Upper Marlboro.

The Miles W. Connor Chapter was named after its founder and first president, the late Dr. Miles Washington Connor. He also served as the first president of Coppin State College. A budget of $50,000 for calendar year 1983-84 was announced by the Chapter president.

Chapter officers for the 1983-84 year are Harlow Fullwood, Jr., president; Lawrence W. Owes, vice president, Valerie A. Jenkins, recording secretary; Martha E. Valentine, corresponding secretary; David S. Jones, treasurer, and the Rev. Maxwell Johnson, chaplain.

NEW AND OLD ALUMNI STAND TALL — Mrs. Madlyn Jones, Stephanie Jones, sophomore majoring in psychology, and Leona S. White, freshman, majoring in English and journalism; Mrs. Sarah W. Brassfield and Dr. Jeannette W Shamwell.

Coppin has Fall, 1983 registration

The weekend and evening college at Coppin State College will be holding fall registration for graduate and undergraduate students Tuesday, August 30 thru September 1 from 5 p.m. to 7 p.m. in the Tawes College Center.

Late registration will be held Tuesday, September 6 thru 9. Classes begin September 9. Courses being offered this fall include nursing, computer science, management science, alcohol and drug counseling along with traditional courses in humanities, the natural sciences, and education.

For more information, call 383-4540 or 4841.

Bowie State offers new courses

Four courses are in the offering for the weekend College to be held at Bowie State College during the Fall Semester. The scheduled courses include Principles of Accounting, Advanced Principles of Real Estate, Computer Programming I, and Astronomy.

Classes will meet on Saturday-mornings for 2 ½ hours. Registration will be held August 24, 25, and 26.

Maryland Institute, College of Art

Freud asked his famous question in exasperation. Goucher answers it rationally: Today's woman wants options and opportunity. At every stage of her life.

"WHAT DOES A WOMAN WANT?"

A superior liberal arts education for recent or prospective high school graduates or for college students planning to transfer. Women can prepare for a career through course programs, internships, and mentorships with successful women. Undergraduates may commute or live on Goucher's spacious, wooded campus. For information on fall '84 enrollment, call 337-6100.

Coeducational master's degree programs in dance movement therapy and art therapy. Full-time or part-time study is possible, and evening and weekend courses are available for mental health professionals. For fall enrollment information, call 337-6373.

An interesting variety of non-credit classes for both men and women. Courses range from computers and information systems to career advancement in the arts. The Teachers' Institute offers professional graduate credit courses for teachers of the gifted at both the elementary and secondary school levels. Call 337-6200.

Management and computer training for women with bachelor's degrees who wish to change careers or return to work. The Women's Management Development Program provides an overview of business structure and principles; the Women's Program in Information Systems focuses on accounting, computer programming (COBOL), and management theories. Each has classes from September to September, followed by a paid internship with a Baltimore area business. Next season begins fall '84. Call 337-6352.

A second chance for women who have been out of school at least five years and have had less than two years of college experience. The Goucher II program helps women start on their way to a bachelor's degree. Classes meet once a week for two years and offer one year of college credit. Most graduates transfer into Goucher's regular undergraduate program. Call 337-6200 for fall '83 enrollment information.

Bowie State carving niche for itself with technology courses

Bowie State College is carving a niche for itself in the foundation of the technology boom of the 1980's with the planned implementation of seven degree—earning programs designed to prepare students for the tremendous career opportunities in the wake of the field's emergence.

Two of the programs, Bachelor of Science in Computer Science and Master of Arts in Human Resource Development will begin in the Fall, 1983 semester.

A Master of Science in Computer Technology and a Bachelor of Science in Technology are scheduled for January, 1984 and a Master of Science in Management Information Systems is scheduled for Fall, 1984.

A program for Generic Nursing is scheduled for Spring, 1984. Additionally, a Master of Science in Nursing is being scheduled for Fall, 1985. The proposed programs are pending approval by the Board of Trustees of the State Universities and Colleges and the Maryland State Board of Higher Education.

This new position for Bowie comes as a result of its Board of Trustees' decision to evaluate the existing programs and chart a course which would aid the institution's ability to be a valuable educational and career development resource.

The baccalaureate program, as outlined by Associate Dean of Academic Affiars, Johnny Ponds, will be designed to prepare students for placement as systems analysts, scientific programmers, and applied mathematicians.

"The Bachelor of Science in Computer Science," Ponds said, "will include 47 credit hours of general education requirements, 36 credits in the computer sciences, 30 in mathematics and, of course, some electives."

The Bachelor of Science in Technology is designed, according to Ponds, to aid the community college graduate pr two—year certificate recipient in achieving a baccalaureate degree and will be composed of upper division courses with 10 areas of concentration.

The Master of Arts in Human Resource Development, or HRD, according to its course proposal, "prepares individuals for careers in Human Resource Development, with an emphasis on practical and theoretical knowledge."

The curriculum consists of 15 courses providing 45 credit hours of preparation for potential business and industrial careers.

The field, HRD, expresses the function of counseling psychology, training and the development of human ability in its potential to increase employee productivity and job satisfaction.

The Generic Nursing major proposes to present to the student, experiences both practical and theoretical, which will lead to entry into the field as a required nurse, in addition to awarding a Bachelor of Science Degree. There is limited admission, which requires a direct application, in addition to the general college application and is based upon academic qualifications.

The Master of Science in Nursing is planned as a follow—up of the Generic curriculum, as well as a "fine—tuning" of the career development. The scope will not only include medical—surgical nursing, but will also examine the societal functions of the health care practitioner.

The Master of Science in Management Information Systems been conceived, according to the course prospectus, as an "academic and practical expansion of relevance in' a the theory of management, its applications and potential for enhancement in data processing, b mathematics theory and applications to information flow and control and data storage and retrieval, and ctheory of communication and applications to telecommunications networks operation, to link information flow and data processing capability."

Atlanta University joins effort to improve governance at schools

Atlanta University has joined with several other colleges and universities who are members of the United Negro College Fund, Inc. (UNCF) in a major project designed to improve member institutions' governance and management.

Dr. Kofi B. Bota, acting president of Atlanta University, recently announced that the university has received a $118,400 grant from the W.K. Kellogg Foundation of Battle Creek, Michigan, making it possible for the institution to participate in the comprehensive activity known as the Integrated Systems Approach to Improving Management. The project is being administered by the UNCF.

Activities at Atlanta University will be conducted through March 31, 1984. Grant monies will provide technical assistance in developing an up-to—date management program in management information systems, recruiting and admissions, governance, long—range planning, institutional advancement, business and fiscal affairs, and personnel administration.

Atlanta University, founded in 1865, is responsible for graduate and professional education in the Atlants University Center, a consortium of seven institutions of higher education. More than 1,000 students are enrolled in master's, specialist, and doctoral degree programs in the five schools of the University: Arts and Sciences, Business Administration, Education, Library and Information Studies, and Social Work.

Specific areas upon which improvement efforts are concentrated at colleges participating in the UNCF—sponsored project are determined by an assessment team made up of experts in the various areas of institutional management and representatives of the American Council on Education, the Association of Governing Boards of Colleges and Universities, and the National Association of College and University Business Officers. These three associations are working in cooperation with the UNCF in implementing the project.

The UNCF is conducting the comprehensive management improvement program over a three—year period through a grant of $3,662,600 from the Kellogg Foundation. Institutions within the 42—member UNCF which participate in the program will receive follow—up monitoring and consultations from assessment team.

It is anticipated that the services offered through this special project will be continued by the national organizations serving on the assessment teams and assisting with the technical work once the project is completed.

The W.K. Kellogg Foundation, established in 1930 to "help people help themselves," has distributed more than $643 million in support of programs in agriculture, education, and health. Areas of emphasis within these broad fields include adult continuing education; betterment of health; coordinated, cost—effective communitywide health services; a wholesome food supply; and broadened leadership development. The foundation is today among the largest private philanthropic organizations in the nations. It supports programs in the United States, Latin America, and the Caribbean as well as international fellowship programs in other countries.

TONYA L. ANDERSON recently received her bachelor's degree from University of Dayton. A graduate of Western High School, Tonya will be attending the University of Colorado in September. She is the daughter of Barbara J. Anderson and granddaughter of Doris Jeffries.
